

HAPPY 4th of July INDEPENDENCE DAY

America 250 Anniversary ★ 1776-2026 ★

This year, our Fourth of July carries extra weight, 250 years since we first declared that a more perfect union was worth striving for. That journey was never meant to be easy, and it still isn't.

Every generation before us faced its own moment of doubt, its own reason to wonder if the work was worth it, and yet, here we are, two and a half centuries later, still striving.

So today, let's hold onto what that means: that imperfect as we are, we keep choosing each other, again and again. We are always stronger when we work together than when we let our differences divide us.
