

It's Summer Time

Summer has been a record setting heatwave this year in 2023 but that's not the only thing heating up. The market year-to-date has seen interest rates rising, which has stoked a less speculative market. However, builders are still building, and the electrical market, as a whole, is keeping its wheels turning with strong numbers in spite of seasonality and macro factors.

Portor is thrilled to announce ASA Electrical Solutions has taken the reigns for us in our greater San Diego, California territory. ASA has been serving the electrical and lighting field for over 15 years and boast a strong team of knowledgeable sales staff and customer success driven support teams in more than 7 states in the Southwestern United States.

DLS2-R Series Slim Round Recessed Downlight with 5CCT

277V Slim Downlight

Portor's second generation DLS2 Series has added a 120-277V version to the repertoire of downlights. The DLS2 is a slim, recessed downlighting featuring 5CCT selectability, edge lit technology and an IC rating. The construction includes a standard sealing gasket and remote J-box for ease of installation with no can needed and is 0-10V dimmable.
